

2018 Michigan Peregrine Falcon Nesting Summary

Northern Lower Peninsula Region

1. Mackinac Bridge, linking Upper and Lower Peninsulas, Emmet, Michigan
 - Nest location: Mackinac Bridge
 - 1st year active: 2009
 - Total number of chicks produced to date: 10
 - Male: Frank (b/r 56/C) hatched at International Bridge, Sault Ste. Marie, MI in 2015
 - Female: Unbanded
 - Young:
four unbanded chicks
 - Notes:
Nesting occurred in the northern box on the Bridge, and four chicks successfully fledged. This is the same box where six peregrines (1 adult, 5 chicks) were found dead in 2016.
2. Midland Cogeneration Venture, Midland, Midland, Michigan
 - Nest location: Midland Cogeneration Venture
 - 1st year active: 2014
 - Total number of chicks produced to date: 12
 - Male: Coleman (b/r 21/P) hatched at University of Michigan Medical Center, Ann Arbor, MI in 2014
 - Female: Unbanded
 - Young:
two unbanded female chicks
one unbanded male chick
 - Notes:
There was a nesting box installed but it is not yet being used – all three chicks fell from the nesting location to the ground before fledging. One chick was injured and was picked up by Wildlife Recovery Association of Shepherd, MI. The two other juveniles are no longer on-site and it is assumed that they fledged.

Southeast Region

3. Consumers Energy D.E. Karn/J.C. Weadock Plant, Hampton Twp., Bay, Michigan
 - Nest location: Karn/Weadock Power Plant
 - 1st year active: 2008
 - Total number of chicks produced to date: 8
 - Male: Undetermined
 - Female: Undetermined
 - Notes:
The birds appear to again have nested on the plant that's being demolished based on their behavior. Due to demolition, the site is inaccessible.
4. Flint/Durant Hotel, Flint, Genesee, Michigan
 - Nest location: Durant Hotel
 - 1st year active: 2009
 - Total number of chicks produced to date: 14

- Male: Barry (b/g 36/H) hatched at Cleveland, OH in 2001
 - Female: Unbanded
 - Notes:
Three chicks hatched and there was one unviable egg. All three chicks died around 17 days of age due to unknown causes; potentially due to extreme weather exposure.
5. McLaren Flint Hospital, Flint, Genesee, Michigan - **NEW SITE**
- Nest location: McLaren Flint Hospital
 - 1st year active: 2018
 - Total number of chicks produced to date: 0
 - Male: Undetermined (b/r)
 - Female: Unbanded
 - Notes:
The nest was initially observed on 15 May with two eggs; hospital staff had seen 3 eggs prior to the visit. By a 5 June visit, both eggs had been smashed.
6. Jackson County Building, Jackson, Jackson, Michigan
- Nest location: Jackson County Building
 - Online resources: http://www.co.jackson.mi.us/tower_falcons.asp
 - 1st year active: 2008
 - Total number of chicks produced to date: 33
 - Male: Chayton (b/g C/57) hatched at Toledo, OH in 2007
 - Female: Big Red (b/r 33/K) hatched at Chicago, IL in 2008
 - Young:
Bonneau, M (b/blu 74/R) 1156-22253
Nixon, F (b/blu 39/Z) 1947-27598
Carey, M (b/blu 75/R) 1156-22254
Holzapfel, F (b/blu 38/Z) 1947-27597
 - Notes:
The four chicks were named after the last four Jackson Police Department officers to fall in the line of duty.
7. Macomb County Building, Mt. Clemens, Macomb, Michigan
- Nest location: Macomb County Building
 - Online resources: <http://macombgov.org/peregrine/>
 - 1st year active: 2005
 - Total number of chicks produced to date: 25
 - Male: Nick (b/g 30/C) hatched at Whittier Apartments, Detroit, MI in 2006
 - Female: Hathor (b/g *H/*4) hatched at University of Pittsburgh, Pittsburgh, PA in 2003
 - Notes:
The male at this site is likely Nick, but it can't be confirmed.
- A total of three eggs were laid in three different corners of the 11th floor (one in NE, one in NW, one in SE); none hatched.
8. General Motors Tech Center (formerly Campbell-Ewald Building), Warren, Macomb, Michigan

- Nest location: General Motors Tech Center
 - 1st year active: 2010
 - Total number of chicks produced to date: 12
 - Male: General Brock (black 22/V) hatched at Windsor, ON in 2012
 - Female: "Isabella" (b/r 74/X) hatched at Consumers Energy Campbell Plant, Port Sheldon, MI in 2011
 - Young:
 - Sky, M (b/blu 49/C) 1156-26796
 - Sierra, F (b/r C/36) 1947-27599
 - Regal, M (b/blu 48/C) 1156-26771
 - Vette, F (b/r C/35) 1947-27600
 - Notes:

Sierra fell from the nestbox to the roof on 26 May but was uninjured and continued to be fed by parents. On 13 June, Vette struck a window. She was taken to Morrison Animal Hospital, deemed uninjured, and transported to D. Hogan for rehabilitation. She was released back on-site on 21 June.
9. J.R. Whiting Plant, Erie, Monroe, Michigan
- Nest location: Whiting Plant
 - 1st year active: 2011
 - Total number of chicks produced to date: 7
 - Male: Undetermined (b/r)
 - Female: Undetermined
 - Notes:

The power plant is being actively demolished. The site was visited on 30 April, and the male (B/R) was observed perched on the water tower. No other breeding activity was observed. A 65 foot tall nesting tower was constructed on the adjacent CECO property overlooking Camp Lady of the Lakes to mitigate demolition of old site.
10. Detroit Edison Power Plant, River Raisin, Monroe, Monroe, Michigan
- Nest location: DTE River Raisin Monroe Plant
 - 1st year active: 1994
 - Total number of chicks produced to date: 44
 - Male: Max (b/g D/77) hatched at Toledo, OH in 2005
 - Female: Undetermined
 - Young:
 - Kristen, F (b/blu 43/K) 1947-33177
 - Ginger, F (b/r 77/U) 1947-33178
 - Wanda, F (b/r 78/U) 1947-33179
 - Houdini, M (b/blu 52/C) 1156-26774
 - Notes:

Between 19 May and 3 June, all four chicks fell from the I-Beam on which they were nesting into the netting below. All were uninjured, rehabilitated by D. Hogan, and released back on-site. All of the chicks were released by 24 June.
11. AT&T Tower, Pontiac, Oakland, Michigan
- Nest location: AT&T Tower

- 1st year active: 2011
 - Total number of chicks produced to date: 18
 - Male: Zeus (b/r 73/B) hatched at LTV Steel, Cleveland, OH in 2009
 - Female: Screech (black 83/X) hatched at Etobicoke Bloor & Islington, Sun Life Centre, Toronto, ON in 2008
 - Young:
 - one unbanded female chick
 - Notes:
 - This nest site is inaccessible for viewing eggs or young chicks and does not allow for banding. One chick was just visible and appeared to be about 25 days old on 29 May; it had fledged by 12 June.
12. Detroit Zoo, Royal Oak, Oakland, Michigan
- Nest location: Detroit Zoo
 - 1st year active: 2016
 - Total number of chicks produced to date: 8
 - Male: Justice (b/r 08/P) hatched at Jackson County Building, Jackson, MI in 2012
 - Female: Unbanded
 - Young:
 - Shepherd, M (b/blu 53/C) 1156-26775
 - three unbanded chicks
 - Notes:
 - Shepherd fell, got rehabbed by D. Hogan, and released back on site on 14 June.
13. Sapphire Apartments/North Park Towers, Southfield, Oakland, Michigan
- Nest location: Sapphire Apartments/North Park Towers
 - 1st year active: 2016
 - Total number of chicks produced to date: 3
 - Male: Unbanded
 - Female: Juliet (b/blu 21/N) hatched at Evanston, IL in 2016
 - Young:
 - two unbanded female chicks
 - Notes:
 - In addition to the two hatched chicks, there were four unhatched eggs.
14. St. Clair Detroit Edison, Marine City, St. Clair, Michigan
- Nest location: St. Clair Detroit Edison Power Plant
 - 1st year active: 2003
 - Total number of chicks produced to date: 5
 - Notes:
 - Status unknown.
15. Blue Water Bridge, Port Huron, St. Clair, Michigan
- Nest location: Blue Water Bridge
 - 1st year active: 2005
 - Total number of chicks produced to date: 31
 - Male: Unbanded
 - Female: Tonga (black 85/H) hatched at MEC, Mississauga, ON in 2003

- Notes:
The nestbox has been moved back to the north span after it had been moved to the south span in 2017 for bridge maintenance on the north span. On 5 June, Tonga was sitting in the box, but there were no eggs or chicks.
16. Pere Marquette Railroad Bridge, Port Huron, St. Clair, Michigan
- Nest location: Pere Marquette Railroad Bridge
 - 1st year active: 2017
 - Total number of chicks produced to date: 0
 - Male: Undetermined (b/r)
 - Female: Unbanded
 - Notes:
A pair was observed at the site, but no evidence was observed of the birds ever having laid eggs or feeding chicks. The site is not accessible for viewing potential nest locations.
17. University of Michigan, Ann Arbor, Washtenaw, Michigan
- Nest location: North Quad Tower
 - 1st year active: 2006
 - Total number of chicks produced to date: 29
 - Male: Beacon (b/g B/15)
 - Female: KJ (b/blu 53/M)
 - Young:
Betsy, F (b/blu 44/K) 1947-33180
Mojo, F (b/blu 45/K) 1947-33181
Markley, M (b/blu 51/C) 1156-26773
Bursley, M (b/blu 50/C) 1156-26772
 - Notes:
This is KJ's first year at this site. She replaces Thunderbolt who was present last year. The chicks were named for four of the residence halls on the UM campus. On 28 June, Betsy struck a building and was sent to rehab. On 3 July, Bursley, Mojo and Markley were found trapped in a lower access area of the roof. They were captured and released back on the roof. Mojo immediately flew while Bursley and Markley stayed on the roof. On 5 July, upon the successful release of rehabilitated Betsy, Bursley and Markley were found back down in that lower access area. Markley was deceased and Bursley was lethargic and malnourished. Bursley was taken into rehab but ultimately died as well.
18. Eastern Michigan University, Ypsilanti, Washtenaw, Michigan
- Nest location: Pierce Hall Tower
 - 1st year active: 2016
 - Total number of chicks produced to date: 0
 - Notes:
Site never visited and no activity reported in 2018. This site will not be included in future reports.
19. Village Plaza, Dearborn, Wayne, Michigan
- Nest location: Village Plaza
 - 1st year active: 2017

- Total number of chicks produced to date: 0
 - Male: Fryer (b/blu 43/C) hatched at Flint, MI in 2016
 - Female: Maggie (b/blu 09/M) hatched at Fort Wayne, IN in 2016
 - Notes:
No signs of a scrape or eggs were found on any level of the roof or ledges, but birds were consistently seen at and territorial of the site.
20. Parklane Tower East, Dearborn, Wayne, Michigan
- Nest location: Parklane Tower East
 - 1st year active: 2013
 - Total number of chicks produced to date: 2
 - Male: Unbanded
 - Female: Undetermined
 - Notes:
Possible nest failure. There was no evidence of young. The adult female was not observed and no eggs were found in the suspected nesting locations. However, a broken egg on the ground near the SE corner of the E tower was reported to the DNR (with photo) by tower employees on 19 June.
21. New Center/Fisher Building, Detroit, Wayne, Michigan
- Nest location: New Center
 - 1st year active: 1993
 - Total number of chicks produced to date: 40
 - Male: Iggy (b/r 66/M) hatched at University of Detroit Mercy, Detroit, MI in 2011
 - Female: Mystique (black 20/W) hatched at London, ON in 2006
 - Young:
Kahnie, F (b/blu 46/K) 1947-33182
one unbanded male chick
 - Notes:
Kahnie was picked up in New Center Park on 4 June. She was on the ground and unable to fly. She was taken into rehab and released back at the Fisher Building on 14 June. On 12, June the DNR learned that the other Fisher Building chick had been picked up by a bystander on 1 June. The bystander took it to their home before bringing it to Spirit Filled Wings on 3 June. Spirit Filled Wings transferred the bird to D. Hogan on 14 June for rehab and conditioning. This unbanded male was released back at site on 19 June. Kahnie is named after Albert Kahn, the architect who designed the Fisher Building. On 6 August, Mystique ended up in an annex portion of Cadillac Place and was unable to fly out on her own. She was captured and released back on the roof of Cadillac Place on the same day.
22. University of Detroit Mercy, Detroit, Wayne, Michigan
- Nest location: Bell Tower
 - 1st year active: 2005
 - Total number of chicks produced to date: 21
 - Male: Kekionga (b/g 9/*R) hatched at One Summit Square, Fort Wayne, IN in 2002
 - Female: Unbanded

- Notes:
Nesting failed. There has been no nesting success at this site since repairs were made at nest ledges in 2011. A nest tray was installed in 2015.
23. Whittier Apartments, Detroit, Wayne, Michigan
- Nest location: Whittier Apartments
 - 1st year active: 1995
 - Total number of chicks produced to date: 29
 - Male: Promise (b/r E/06) hatched at 5/3 Building, Kalamazoo, MI in 2014
 - Female: Theresa (b/r 20/W) hatched at St. Mary's Hospital, Chicago, IL in 2012
 - Young:
two unbanded male chicks
one unbanded female chick
 - Notes:
Limited access to the building and was unable to make contact with owners after multiple attempts. There is one male and one female chick for certain – the third chick is likely a male.
24. Wayne State University, Detroit, Wayne, Michigan
- Nest location: Old Main
 - 1st year active: 2016
 - Total number of chicks produced to date: 8
 - Male: Freedom (b/r 09/P) hatched at Jackson County Building, Jackson, MI in 2012
 - Female: Isabella (b/r 27/K) hatched at LG&E (Trimble County) Plant, Bedford, KY in 2013
 - Young:
one unbanded male chick
one unbanded female chick
one unbanded chick
25. Detroit Masonic Temple, Detroit, Wayne, Michigan
- Nest location: Detroit Masonic Temple
 - 1st year active: 2016
 - Total number of chicks produced to date: 0
 - Male: Unbanded
 - Female: Undetermined (b/r)
 - Notes:
Both the male and female were present in the spring and throughout the summer, but a nest site was never detected.
26. Book/Ameritech/SBC/Now AT&T, Detroit, Wayne, Michigan
- Nest location: Ameritech Building
 - 1st year active: 1992
 - Total number of chicks produced to date: 65
 - Male: Refrigerator (b/r P/39) hatched at Cook County, IL in 2015
 - Female: Unbanded
 - Young:
one unbanded male chick

- Notes:
The pair nested on a 17th floor vent ledge. The juvenile male was found on ground on 24 June. On 25 June it was taken into rehab but died on 28 June, seemingly due to collision injuries.
27. National Steel/Zug Island/River Rouge, Rouge River, Wayne, Michigan
- Nest location: River Rouge Plant
 - 1st year active: 2002
 - Total number of chicks produced to date: 8
 - Notes:
This site was never visited and no reports of activity were received.
28. Grace Lake, Van Buren Charter Township, Wayne, Michigan
- Nest location: Grace Lake
 - 1st year active: 2016
 - Total number of chicks produced to date: 0
 - Notes:
A single individual was observed in late winter 2018, but a pair or nest was not observed.
29. Wyandotte Power Plant, Wyandotte, Wayne, Michigan
- Nest location: Wyandotte Power Plant
 - 1st year active: 2012
 - Total number of chicks produced to date: 0
 - Notes:
No nesting activity was observed but at least one individual was observed periodically through late winter/early summer by plant staff.

Southwest Region

30. Federal Center Building, Battle Creek, Calhoun, Michigan
- Nest location: BC Tower
 - 1st year active: 2006
 - Total number of chicks produced to date: 0
 - Male: Undetermined
 - Female: Undetermined
 - Young:
 - Notes:
The installed nest box remains on the Federal Center but was again not used for nesting. Birds have historically roosted on the nearby Heritage Tower which is currently unoccupied and had been condemned. Josh Haas of Battle Creek Brigham Audubon worked with the Battle Creek Foundation and the building's new owners to obtain permission to install a nest box on the building in March of 2018. The falcon pair in Battle Creek laid at least 2 eggs in a ledge on the building, but the fate of the nest is unknown as continued building deterioration prevented further monitoring, and exterior renovation work may have disturbed the birds. The nest box appeared to be of no interest to the birds and was removed later in the year. A pair remained in the city at the end of the summer and were being seen regularly around the Federal Center.
31. Spartan Stadium, Michigan State University, East Lansing, Ingham, Michigan

- 1st year active: 2006
 - Total number of chicks produced to date: 2
 - Notes:
There was no evidence of breeding on campus. Birds continue to occasionally be encountered on campus, however. Dr. Jim Sikarskie retrieved an injured passage peregrine from the vicinity of Spartan Stadium in March which appeared to have suffered from a window collision.
32. Board of Water and Light Eckert Plant, Lansing, Ingham, Michigan
- Nest location: Board of Water and Light Eckert Plant
 - Online resources: <http://www.lbwl.com/falcon.aspx>
 - <https://www.facebook.com/LBWLPergrineFalcons>
 - 1st year active: 1991
 - Total number of chicks produced to date: 29
 - Male: Tornado (b/r 02/C) hatched at Consumers Energy B.C. Cobb Plant, Muskegon, MI in 2010
 - Female: Unbanded
 - Young:
Magic, F (b/blu 80/Y) 1947-33147
33. Boji Tower/Michigan National Bank/State Capitol, Lansing, Ingham, Michigan
- Nest location: Comerica Bank
 - 1st year active: 1998
 - Total number of chicks produced to date: 0
 - Male: Undetermined
 - Female: Titan (b/r C/32) hatched at Jackson County Building, Jackson, MI in 2014
 - Notes:
Titan was discovered defending three eggs by Eyde Company staff on 5 April. This was the first year that birds had been found using the Comerica Bank building. This is likely the pair that has historically been roosting and attempting to nest on the nearby Boji Tower. The eggs were laid in a recessed lip at the top of the building's exterior wall. The area is approximately 2 feet deep and lined with metal sheeting. When the nest was checked again on 1 May, only one broken egg remained. Nest failure was likely due to heavy rain. The adults remain in the area, and the building owner is open to improving the site to increase its likelihood of success.
34. Fifth Third Bank Building, Kalamazoo, Kalamazoo, Michigan
- Nest location: Fifth Third Bank Building
 - Online resources: <http://www.kalamazoofalcons.com/>
 - 1st year active: 2010
 - Total number of chicks produced to date: 19
 - Male: "Kewpee" (b/r 81/D) hatched at Lima, OH in 2010
 - Female: Rebecca (b/g *W/*C) hatched at South Bend, IN in 2009
 - Young:
Merze, F (b/blu 27/Z) 1947-33153
Iris, F (b/blu 28/Z) 1947-33154

Zoe, F (b/blu 29/Z) 1947-33155

Jeter, M (b/blu 30/C) 1156-26732

- Notes:

In past years, when a youngster fell or jumped into the well he would not be able to get out on his own because of the depth. A ramp was installed in the window well in the fall of 2016 in the hope that any young falcon that ends up on the floor of the window well could walk up the ramp to get back to the box and the parapet ledge. This year the young birds entertained themselves by jumping into the window well and hanging out in the shade, then walking back up the ramp. This behavior started during the very hot Memorial Day weekend, and it seemed that the youngsters figured out it was cooler in the shade down there. Pretty soon Rebecca and Kewpee were jumping in and flying back out which is the first year they have been seen doing that.

Merze: This bird was named Merze in honor of Merze Tate. Vernie Merze Tate was a professor, scholar and expert on United States diplomacy. She was the first African-American graduate to earn a B.A. degree from Western Michigan Teachers College, first African-American woman to graduate from University of Oxford, first African-American woman to earn a Ph.D. in government and international relations from Harvard University, as well as one of the first two female members to join the Department of History at Howard University. When Merze Tate graduated from WMU, despite her stellar academic record, African Americans were not hired to teach secondary education in Michigan. She went on to teach at Crispus Attucks High School in Indianapolis, IN, where she created a Travel Club, which took the students of the all-African American high school, to such places as Washington D.C., Niagara Falls, and Pennsylvania during the Depression Era. A current travel club for girls was started by Sonya Bernard-Hollins in 2008 when she learned of Tate's legacy; the Merze Tate Explorers visited on July 19 to "meet" Merze, the falcon. Merze was found dead by a groundskeeper at Senior Services on July 23 after apparently hitting a telephone pole or wire.

Iris: Iris was a name suggested by Parchment 6th graders in reference to the state wildflower of Michigan, the dwarf lake iris. Iris, the Peregrine falcon, sports a strong blonde eyebrow and cheek patch in her juvenile marking, which resemble the yellow band in the sepals of the blue iris flower.

Jeter: The next bird to leave the box was the male, who had been named Jeter, after Kalamazoo baseball legend Derek Jeter. On May 31, he tried to make his first flight and ended up on East Michigan Avenue and was hit by a car.

35. Grand Rapids, Grand Rapids, Kent, Michigan

- Nest location: Kent County Courthouse
- Online resources: <https://grperegrines.wordpress.com/>
- 1st year active: 2004
- Total number of chicks produced to date: 18
- Male: Undetermined

- Female: Undetermined
 - Young:
 - Unnamed, F (b/blu 28/K) 1947-33157
 - Unnamed, F (b/blu 29/K) 1947-33158
36. L.V. Eberhard Center, GVSU, Grand Rapids, Kent, Michigan
- Nest location: L.V. Eberhard Center
 - Online resources: <http://148.61.146.222/CgiStart?page=Single&Language=0>
 - 1st year active: 2017
 - Total number of chicks produced to date: 4
 - Male: Undetermined
 - Female: Undetermined
 - Young:
 - Unnamed, F (b/blu 27/K) 1947-33156
 - Unnamed, M (b/blu 29/K) 1156-26733
37. Consumers Energy B.C. Cobb Plant, Muskegon, Muskegon, Michigan
- Nest location: Shoreline Inn
 - 1st year active: 2003
 - Total number of chicks produced to date: 47
 - Male: *****
 - Female: *****
 - Young:
 - Notes:

Nest boxes were installed on the Shoreline Inn in 2016 to provide alternate nest sites when the B.C. Cobb Power Plant was demolished. The boxes haven't been used to date, and demolition of the power plant didn't begin until April 2018.
38. Grand Haven Board of Light and Power, Sims Plant, Grand Haven, Ottawa, Michigan
- Nest location: Sims Plant
 - Online resources: <http://199.116.53.3/>
 - 1st year active: 2000
 - Total number of chicks produced to date: 45
 - Male: Undetermined
 - Female: Undetermined
 - Young:
 - Unnamed, M (b/blu 35/C) 1156-26737
 - Unnamed, M (b/blu 36/C) 1156-26738
 - Unnamed, M (b/blu 37/C) 1156-26739
39. Consumers Energy Campbell Plant, Port Sheldon, Ottawa, Michigan
- Nest location: Campbell Power Plant
 - 1st year active: 2004
 - Total number of chicks produced to date: 43
 - Male: Undetermined
 - Female: Undetermined
 - Young:
 - Unnamed, M (b/blu 32/C) 1156-26734

Unnamed, M (b/blu 33/C) 1156-26735

Unnamed, M (b/blu 34/C) 1156-26736

Upper Peninsula Region

40. Au Train Island, Au Train Island, Alger, Michigan
 - Nest location: Au Train Island
 - 1st year active: 2002
 - Total number of chicks produced to date: 8
 - Notes:
Unconfirmed reports of chicks present on Au Train Island were received but were not verified.
41. Grand Island, Grand Island, Alger, Michigan
 - Nest location: Grand Island
 - 1st year active: 1993
 - Total number of chicks produced to date: 12
 - Notes:
Status unknown.
42. Pictured Rocks #2, Pictured Rocks National Lakeshore, Alger, Michigan
 - Nest location: Nest Location 1
 - 1st year active: 2010
 - Total number of chicks produced to date: 8
 - Male: Undetermined
 - Female: Undetermined
 - Young:
one unbanded chick
 - Notes:
The same nesting location was used this year as was used last year. One chick fledged.
43. Pictured Rocks #4, Pictured Rocks National Lakeshore, Alger, Michigan
 - Nest location: Pictured Rocks #4
 - 1st year active: 2015
 - Total number of chicks produced to date: 4
 - Notes:
Birds weren't observed nesting this year, but a trail crew reported hearing peregrines in the vicinity on 24 August. Gulls were nesting on the old nesting ledge.
44. Grand Portal Cliff (Grand Portal Point), Pictured Rocks National Lakeshore, Alger, Michigan
 - Nest location: Grand Portal Cliff
 - 1st year active: 1990
 - Total number of chicks produced to date: 28
 - Male: Undetermined
 - Female: Undetermined
 - Young:

- Notes:
A pair was observed and small chicks were seen. The number of chicks and whether they fledged couldn't be determined.
45. International Bridge, Sault Ste. Marie, Chippewa, Michigan
- Nest location: International Bridge
 - 1st year active: 1999
 - Total number of chicks produced to date: 26
 - Male: Unbanded
 - Female: Unbanded
 - Young:
Susan, F (b/blu 17/K) 1947-32985
 - Notes:
The chick was named Susan after Susan Johnston (Ozhaguscodaywayquay in Ojibwe), a prominent Sault resident in the early 1800s.
46. Houghton-Hancock Bridge, Houghton, Houghton, Michigan
- Nest location: Houghton-Hancock Bridge
 - Online resources: <http://pasty.com/nestbox.html>
 - 1st year active: 2013
 - Total number of chicks produced to date: 16
 - Male: Undetermined
 - Female: Undetermined
 - Young:
Hawkeye, M (b/blu 02/C) 1156-26715
Boden, M (b/blu 03/C) 1156-26711
Harmony, F (b/blu 22/Z) 1947-33110
 - Notes:
Hawkeye was hit by a vehicle on 5 July and did not survive.
47. Phoenix Cliffs, Allouez Township, Keweenaw, Michigan – **NEW SITE**
- Nest location: Phoenix Cliffs
 - 1st year active: 2017
 - Total number of chicks produced to date: 0
 - Male: Undetermined
 - Female: Undetermined
 - Notes:
Birds were reported in this vicinity last year though no specifics were provided. Three fledged juveniles were reported this year in late July.
48. Bare Bluff, Michigan Nature Association, Grant Township, Keweenaw, Michigan
- Nest location: Bare Bluff
 - 1st year active: 2011
 - Total number of chicks produced to date: 16
 - Male: Undetermined
 - Female: Undetermined
 - Young:
Nawcy, F (b/blu 00/K) 1947-33111
